

ConnectED Bus: SafeSight

Real-Time Visibility. Smarter Monitoring. Safer Students.

SafeSight™ is a SIM-based camera system that delivers real-time video access, incident insight, and proactive monitoring for school transportation—without the hassle of having to pull SD cards.

Key Benefits

Protect Students on the Move

Monitor inside and around buses in real time.

Stream Live Video

Instant access from any connected device.

Cloud-Based Playback & Alerts

No pulling the SD card or hard drive.

Monitor Blind Spots

Inside, outside, and at bus stops.

Improve Driver Accountability

Tack driving behavior and provide in-cab coaching.

Respond to Emergencies

Enable instant alerts and real-time video for faster action.

Camera & Video Capabilities

- ✓ **360° Camera Coverage** with AI Dual Cam, student, rear, and side cameras
- ✓ **Real-Time Streaming** to administrators and responders
- ✓ **GPS Tracking** & harsh driving detection
- ✓ **Panic Button (BLE)** – instant emergency alerts with a single press
- ✓ **Facial Driver ID** and driver distraction monitoring
- ✓ **Wi-Fi Video Upload** – Auto-upload recorded video to the cloud

Key Use Cases for School Districts

Student Safety

Detect fights, bullying, and unsafe behavior.

Monitor threats near buses and stops.

Driver Accountability

Track driving habits with AI monitoring.

Review incidents and resolve concerns.

Emergency Response

Share live video with first responders.

Access past footage instantly.

**You're not just adding cameras—you're adding
a trusted partner in student safety.**
