

## MISSION-CRITICAL COMMUNICATIONS — ANYTIME, ANYWHERE

**Stay connected, secure, and interoperable — even when primary systems fail.**

Government agencies depend on secure, reliable communications to protect public safety and maintain mission continuity. But traditional landlines, VoIP, and fiber are vulnerable to outages, congestion, and disasters.

The Government Communication Hub is a portable, plug-and-play device that delivers unlimited phone, text, email, even radio interoperability and hotspot connectivity with a dedicated line, 7" touchscreen and wireless priority access. It ensures agencies stay connected, compliant, and interoperable — even when power fails, networks are congested, or primary systems go down.

### Mission-Critical Features:

- ✓ **Uninterrupted Continuity** – Unlimited phone, text, email, and a wireless hotspot.
- ✓ **Priority Access** – Wireless Priority Service (WPS) ensures calls go through first during emergencies.
- ✓ **Interoperability** – T-Mobile Direct Connect bridges with LMR radio systems.
- ✓ **Secure Connectivity** – Optional encrypted T-SIMSecure for sensitive data.
- ✓ **Rapid Deployment** – Ready to use in minutes — just plug it in and go.
- ✓ **Reliable Power** – Built-in 2,000 mAh battery backup sustains operations during outages.
- ✓ **Portable & Adaptable** – Establish communications quickly in offices, command vehicles, shelters, or field sites.

## How the Hub Supports:

### Emergency Management Leaders

It provides disaster resilience through redundant, priority communications at the OEM or rapid deployment elsewhere.

### Police & Fire Chiefs

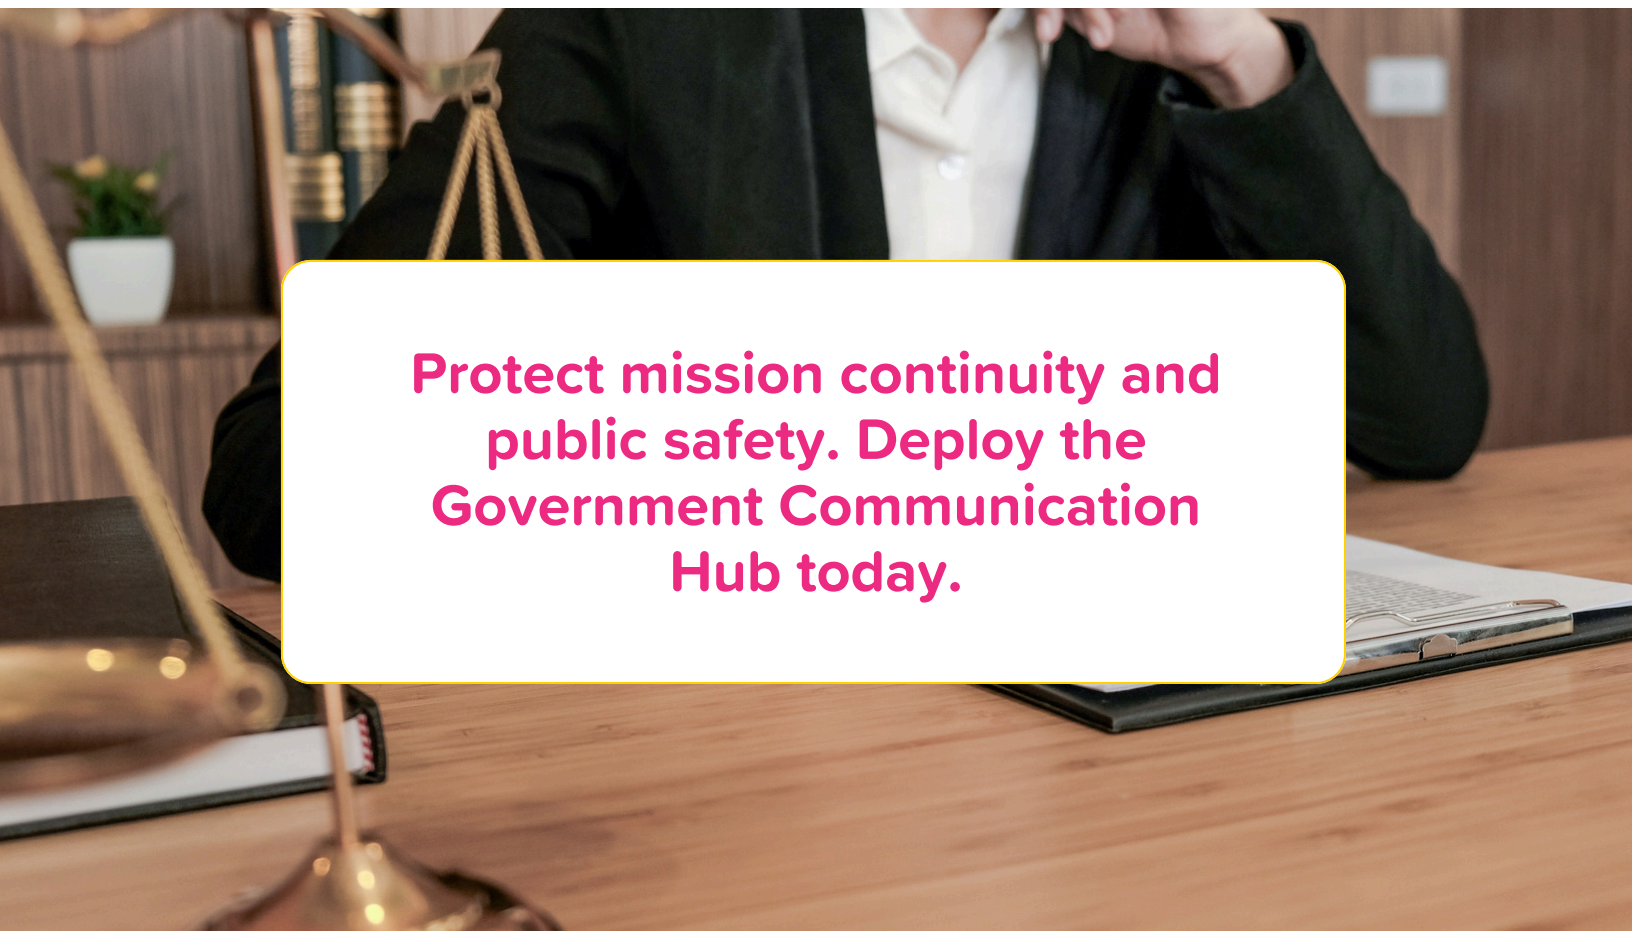

It maintains dispatch and station continuity with a reliable failover solution that works even during outages or periods of congestion.

### IT Directors / CIOs

It ensures secure, compliant, and centrally managed communications with seamless interoperability.

### Mobile Command Center Operators

It strengthens disaster response in the field with priority connectivity, reliable backup power, and full LMR interoperability for seamless coordination.

**Protect mission continuity and public safety. Deploy the Government Communication Hub today.**
