

SAFE, CONNECTED, AND EMPOWERED COMMUNITIES

A single device that delivers emergency readiness and digital access for residents.

Housing Authorities provide more than housing — they create opportunity. Yet many residents still struggle with unreliable communication, lack of internet, and limited access to essential services.

The Communication Hub bridges this gap by providing a safe, affordable, and easy-to-use device that supports emergency calling, digital inclusion, and community empowerment.

What the Hub Delivers:

- ✓ **Emergency-Ready** — E911-compliant phone that works even during power or internet outages, providing residents and families with peace of mind.
- ✓ **Closing the Digital Divide** — Built-in Wi-Fi hotspot and 7" touchscreen for calls, texts, email, apps, education, telehealth, and job access.
- ✓ **Resident Empowerment** — Supports workforce readiness, healthcare, and online resources to help residents gain independence.
- ✓ **Simple & Inclusive** — Easy-to-use interface designed for seniors, families, and residents with limited tech skills.
- ✓ **Affordable & Scalable** — Plug-and-play solution with no complex infrastructure — one device combines phone, text, email, internet, and apps.
- ✓ **Aligned with HUD Priorities** — Advances safety, stability, and digital equity across communities.

How the Communication Helps:

Executive Leadership

It drives mission impact while reducing risk with compliant emergency communication aligned to HUD priorities.

Operations & Property Managers

It keeps communities safe and compliant with a reliable, easy-to-deploy emergency line across multiple sites.

IT / Technology Managers

It simplifies deployment and management with a secure, scalable, all-in-one device that requires no complex integration.

Resident Services & Community Leaders

It empowers residents with digital access for education, telehealth, and job opportunities, helping close the digital divide.

**Give your residents safety,
access, and opportunity with
the Communication Hub.**
