

PROFESSIONAL, SECURE, AND ALWAYS CONNECTED

The all-in-one business communication hub for small offices and remote teams.

Small businesses, home offices and remote workers need affordable, reliable tools that keep them professional, protected, and productive — without unnecessary cost or complexity. Traditional setups force owners to juggle personal numbers, unreliable broadband, or multiple services that add expense.

The Communication Hub replaces all that with one dedicated, secure, and portable device. It delivers a business phone line with voicemail and text, Wi-Fi hotspot backup, a 7" touchscreen for apps and email, and optional encrypted connectivity to protect your data.

Key Benefits:

- ✓ **Professional Presence** – Dedicated business line with voicemail and text — no more using personal numbers.
- ✓ **E911 Compliant** – Provides exact location to 911 dispatch so first responders arrive faster in an emergency.
- ✓ **Reliable Connectivity** – Hotspot backup keeps laptops, POS systems, and devices online during broadband outages or daily use.
- ✓ **All-in-One Simplicity** – 7" touchscreen for calls, email, video, text, and apps.
- ✓ **Cost-Effective** – Consolidates multiple services into one predictable expense.
- ✓ **Flexible & Portable** – Works as a primary or backup communication device for offices, home offices, and temporary setups.

How the Hub Supports Your Team:

Small Business Owners

It presents a professional image with a dedicated business line that is cost effective and secure.

IT Managers

It protects your network with encrypted, compliant connectivity that's simple to control.

Operations Leaders

It maintains professionalism and accountability with a secure, plug-and-play corporate line for remote staff.

Finance Leaders

It simplifies budgeting with one predictable expense that consolidates services and supports remote workers.

Compliance & Risk Managers

It mitigates risk with a secure, compliant business line that protects data and ensures accountability.

**Give your business the
professional edge with the
Communication Hub.**
